[1] CONFIGURABLE FAN SPEED AND POWER CONSUMPTION OF THE PROCESSOR

In the BIOS setup, there is a "Fan Mode" option on the "Advanced" page to configure the fan control, which also has an effect on the maximum power consumption of the processor. The default setting "Normal Mode" offers a good balance between performance, temperature and fan speed. The "Fan Mode" setting also defines the upper limits for the average power dissipation (cTDP) and short-term power dissipation in turbo mode (Turbo TDP):

Fan Mode Setting	CPU Performance	Fan Speed	cTDP	Turbo TDP
Performance Mode	Maximum	High	54W	65W
Normal Mode	High	Medium	45W	65W
Silent Mode	Medium	Low	35W	50W

[2] AUDIO CONNECTOR

The 3.5 mm audio jack on the front panel of this device supports both: headphones with a 3-pole connector and also headsets (with microphone) with a 4-pole connector. Headsets with separate connectors for headphones and microphone will require an appropriate adapter, if the microphone should also be used.
